MITERED CORBEL
PRODUCT # **92800100**

The **Mitered Corbel** is a contemporary timber frame accent used to complement perpendicular planes and add depth and detail to existing structures. Can also be used structurally to support and accent timber frame trusses.
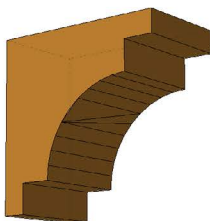

BASIC CURVED CORBEL
PRODUCT # **92800200**

The **Curved Corbel** is a traditional timber frame accent used to complement perpendicular planes and add depth and detail to existing structures. Can also be used structurally to support and accent timber frame trusses.
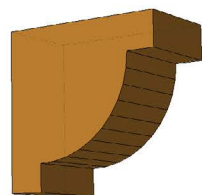

CONTOURED CORBEL
PRODUCT # **92800300**

The **Contoured Corbel** is a classic timber frame accent used to complement perpendicular planes and add depth and detail to existing structures. Can also be used structurally to support and accent timber frame trusses.

CONCAVE CORBEL
PRODUCT # **92800400**

The **Concave Corbel** is an ornamental timber frame accent used to complement perpendicular planes and add depth and detail to existing structures. Can also be used structurally to support and accent timber frame trusses.

CONVEX CORBEL
PRODUCT # **92800500**

The **Convex Corbel** is an ornamental timber frame accent used to complement perpendicular planes and add depth and detail to existing structures. Can also be used structurally to support and accent timber frame trusses.
